

PRODUCT DATA

DRAWING COMPOUND 2426-11-02

A NEW UNIQUE DUAL PURPOSE CHLORINE FREE LUBRICANT FOR YOUR EXTRUSION/HEADING MACHINE

Now available - one product to meet the lubrication needs of both heavy duty extrusions and machine gear/way lubricant operations. No longer the concern and premature dumping of lubricant because of cross contamination between the forming oil and machine lubricant.

Drawing Compound 2426-11-02 provides the lubricant requirements for forming those tough extrusions/headings operations, plus supplies critical lubricity requirements for the machine gears and ways. This product is specially formulated with antioxidants and corrosion inhibitors to insure smooth metalworking operations.

Drawing Compound 2426-11-02 is a value engineered product, chlorine free dual purpose extruding and machine lubricant.

The "hot wetting" characteristics of **Drawing Compound 2426-11-02** prevent the flow of oil away from hot spots on the metal. Excellent wear and increased tool life result from the even flow of product.

CLEANING

Drawing Compound 2426-11-02 is easy to clean. After the forming operation, residue is easily removed with an alkaline or detergent cleaner. Vapor degreasers can also be used to remove the residue.

FEATURES

- * Excellent lubricity
- * Dual purpose
- * Chlorine-free

BENEFITS

- * Long tool life/cost-effective
- * Forming and machine lube
- * Value engineered
